

To whom it may concern, I am an extremely satisfied XM Satellite radio listener who just heard that the petition by the National Association for Broadcasters #04-160 is trying to limit what I can hear on XM Radio. I find this very hard to believe. The items they have a problem with are news and traffic, both of which are important to commuters for safety reasons. I realize there is money in broadcast, but denying drivers road info for the sake of money from advertisers is completely unreasonable. There are many choices for listening out there and I am an XM listener, and isn't that the American way! Choice! Someone is trying to limit my choices and that is un-American. I strongly urge the FCC and lawmakers to turn down petition 04-160 by the NAB because it is wrong and unfair to radio listeners, also, it is Un-American to do that to the American public! Thank you Dena Slocum
